1 (one) original + 2 (two) copies

(Total 3 Sheets)

Each Sheet needs an original
Signature and Raised Seal

Sign and Seal the Mechanical Subcode Technical Section if you are a Master HVACR Contractor or Master Plumber. Sign the Mechanical Technical Card if you hold a NJ Home Improvement Registration or if you are the homeowner residing at the residence. Homeowners **cannot** sign the Mechanical Technical Card for the installation of or replacement of Air Conditioning equipment unless they hold a valid freon installer's certification.

Construction Permit Application F-100

This folder holds the Subcode Technical Sections and all the paperwork

Print all 3 sheets to this folder and submit 1 (one) Original of each sheet.

How many sets of Paperwork do I need?--2 SETS

Plans, Architect/Engineer letters, riser diagrams, as-builts, shop drawings, specifications and anything else you may be submitting above and beyond the Technical Subcode Sections need to be submitted in **duplicate**. **Before you hand in the permit, please be sure to separate the paperwork into two sets. Keep the Subcode Technical sections together--don't split those apart.**

Here's a Tip-----think of----**Builders Copy /Township Copy**

<p>BUILDERS COPY 1 SET</p>	<p>TOWNSHIP COPY 1 SET</p>
--	--

When your permit is issued, you will receive the Builder's Copy and we will keep the Township Copy--they are identical sets. The Builder's Copy is required to be at the worksite so inspections can be performed. If the permit is not at the site, then the inspection **cannot** be done.

Important

The permit should always stay with the property. If the owner sells, the permit should be given to the next property owner for their records.
